

Laminate Flooring

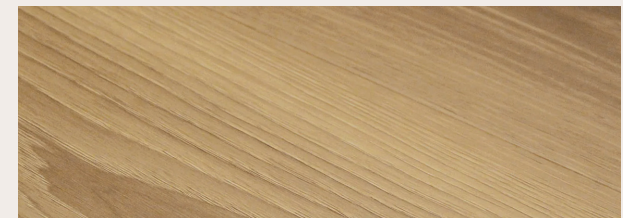

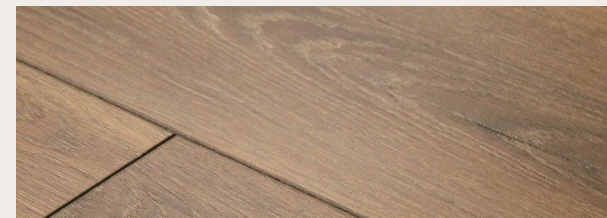

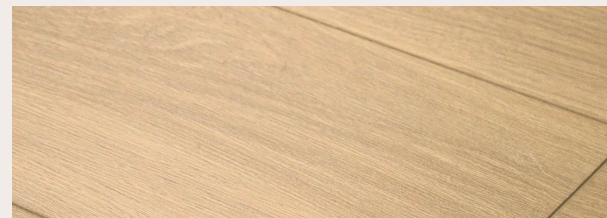

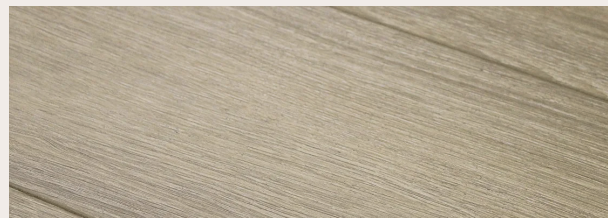

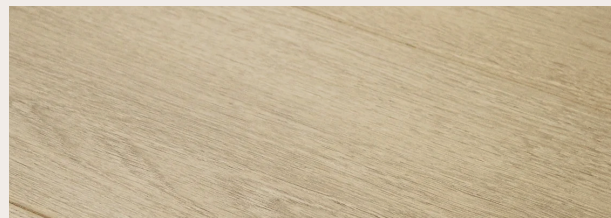

Durability Meets Elegance

Product Highlight

Gemcore by Galleher Duffy

What is Laminate Flooring? ✨

Laminate flooring is a synthetic, multi-layer flooring product engineered to look like real wood while offering enhanced durability. Made by fusing materials under intense heat and pressure, it features a tough protective clear coat, a high-resolution photo of wood grain, and a dense fiberboard core

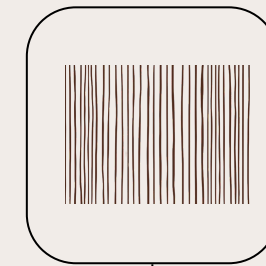

Key Features of ✦ Laminate Flooring

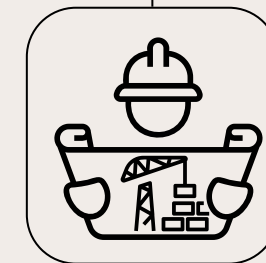

Scratch & Stain Resistant

Affordable

Realistic Wood Appearance

Easy Installation

✦ Benefits for Your Home

01
